

CAREER SERVICES

WHAT WILL YOU DO WHEN YOU GROW UP?

Chances are, we have all been asked this question at least once in our lives, and most of us have heard it with some regularity, or are still being asked that question more often than we would like! The stress of providing a 'quality' response to this question can make for an uncomfortable situation. How many of us truly know what we want to "BE" in the future?

Today's youth are faced with answering many tough questions during their high school years.

Lethbridge School District No. 51's Career Practitioners are here to provide information and support to our high school students in their search for answers and in identifying the necessary steps to achieve their dreams.

Some of the supports that each one of our high schools offer to students through the Career Practitioner's office include:

Free print and online resource materials to inform students about:

- the wide variety of career choices available to them
- how their interests, aptitudes and personalities can help them identify careers that are an ideal 'fit' for them
- Post-secondary learning options including university, college and trades schools, programs and entrance requirements/deadlines
- Funding to continue education – student loans, grants and numerous scholarship programs

Promotion and participation in a variety of career-development activities including:

- Specific programs designed to connect groups of students with industry leaders (Operation Minerva, World of Choices, Youth Exploring Trades/Technologies and Health Care Careers Expo)
- Annual post-secondary, volunteer and job fairs, field trips to post-secondary educational institutions, manufacturing and trades related work sites
