

STEAM

Training for Educators

About the Session:

This full-day workshop will provide educators with the tools needed to explore STEAM in the classroom. Attendees of the workshop will learn about computational thinking and exploring beginner coding. Participants will leave with the confidence that their students can become creators, not just consumers of technology.

This workshop will also incorporate hands on learning by introducing teachers to Micro:bits, and how they may be used in the classroom. Each attendee of the workshop will receive a 10 micro bit package with accessories. (A \$400 Value) Teachers should be able to return to there classrooms and put the concepts they learned into practice the very next day.

Date: Thursday, April 02, 2020 | 9:00 AM - 3:30 PM

Location: TBA

Space is very limited to register at: sapdc.ca
