- Learn outside the classroom
- Develop life-long professional work skills
- Career exploration
- Parent contact
- Build resume
- Job shadow: Family Day week-24 students on job shadow, 19 offered RAP positions. The other 5 found the trade different than anticipated.

The Registered Apprenticeship Program

1. Get a head start on a trade. Most trades are 4 years in length and 1500 hours of work each year. All of the hours the students work in high school go towards that first year and beyond.
2. Earn significant high school credits and earn while they learn-up to 40 credits
3. Build skill set and their resumes. Even if they do not pursue the trade after high school, they develop a skill set of critical thinking, learning to work safely, following multiple instructions, developing a strong work ethic etc. that employers are looking for.
4. It's an opportunity to dovetail career paths and education types: for example, become an electrician (college) and an electrical engineer (university). What an excellent way of combining the practical and theoretical ways of learning.

Colten Ensign: Wayne's Metal Works

Trades' Tours: Southland Trailers, Southland International, Lethbridge Iron Works, HaulAll etc.

The Registered Apprenticeship Program (RAP)

RAP Information Evening

Thursday, April 28, 2022

7:00 pm

There will be a RAP information evening for grades 9-12 students and their parents/guardians.

7:00 pm Start with a plant tour of the new Southland Trailer Corp/Plant 2, a large manufacturing company which offers a number of trades. Located at 4400 9th Ave N. (see map below)

7:30 pm Move to 828 45 St N where there will be a presentation of how the RAP program works, how students can become involved in the program, trades that are in high demand and what employers are looking for in young employees. (This is also where the vehicle museum is located).

After that there will be an opportunity to view George Kirkham's (owner/president of Southland International) International vehicle collection. This 22,500 square foot museum has over 60 vehicles dating from 1913-1982. There are also old signs, antique gas pumps, etc. You have the unique opportunity to climb in these vehicles and experience amazing history housed in Lethbridge. And try out the virtual welder from Lethbridge College.

Refreshments will be provided. For more information see contact information below. You do not need to RSVP.
